Next generation eBus

SWITCH EiV12 is our first fully electric bus specifically designed for the Indian market. This next-generation eBus, features customer-centric offerings on technology and passenger comfort, while being contemporary and futuristic.

SWITCH EiV12 delivers exceptional drive performance and efficiency, and is embedded with proprietary, connected technology solutions, 'SWITCH iON', enabling remote, real-time diagnostics and monitoring services, as well as world-class digital battery management tools.

Superior efficiency with long battery life

The SWITCH EiV range of buses have been uniquely configured to meet customer requirements offering maximum passenger capacity and comfort. The buses are also equipped with new generation advanced chemistry LFP batteries, specially formulated for the Indian market and climatic conditions.

Staff Bus

Light & Smart ebus for short & medium distance travel

Lower Seating Height

One step lesser from entry to seating area

Floor Mounted Batteries

Lower center of gravity for excellent vehicle stability

Streamline Bus Design

Aerodynamic, smooth gliding through highways

Dual Gun Fast Charging

For less charging time & quick turnaround between trips.

Charger Ports in Rear Bus Panel

Ergonomically located for quick charger plug-in / plug-out operations

Large Window Glass Area

Provides roomy feel & comfortable ride

Safety

Equipped with Fire Detection & Suppression System (FDSS)
